

## AIMS AND LEARNING OUTCOMES

*"The self-awareness and development that I experienced throughout this year long course was absolutely immense and the prospect of working as a supervisor having undertaken a shorter, less in-depth course fills me with absolute dread". JL*

### COURSE AIMS

The Diploma in Supervision will enable students to:

- develop a theoretical understanding of professional supervision and apply this to the professional context in which they work
- practise and develop their supervisory skills under the guidance and support of the tutor team
- develop an understanding of the centrality of the relationship in supervision and how to develop an effective supervisory relationship
- explore the ethical, professional and legal issues in supervisory practice
- develop an awareness of the theory of group dynamics and apply this to group supervision
- identify ways in which issues of race, gender, sexual orientation and disability affect professional practice and supervision.

### LEARNING OUTCOMES

On completion of the course students will be able to:

- form an effective supervisory relationship with both individuals and groups
- apply their theoretical knowledge and understanding of professional supervision to their practice as supervisors
- consider ethical, professional and legal issues within supervision
- provide supervision in various contexts
- offer individual and group supervision

*"I value the skills I have learned and developed and the theory alongside the practical aspects of professional supervision and would consider this the minimum standard that should be accepted by anyone seeking out a Supervisor."*
